

CORDLESS SCREWDRIVERS VDE 1000 VOLT SPEEDE® II ELECTRIC

ITEM: SPEEDE® II ELECTRIC

Cordless screwdrivers ideal for all electrical screwdriving jobs, such as the assembly of electrical sockets, work in electrical cabinets, industrial maintenance and assembly, maintenance and repair of motors. SpeedE® II is equipped with an integrated material protection function and in the case of screwing on delicate products, thanks to the tightening torque selection button, it will be possible to take advantage of a maximum force of 0.4 Nm and manually complete the final closure, while in screwings that require a higher torque it will be possible to increase the electric force to 1.0 Nm. SpeedE® II still guarantees manual use up to 12 Nm.

Features:

- Electric screwing with protective function of the material thanks to closing force adjustment via min / max button (0.4 Nm - 1.0Nm)
- LED light for illuminating the work area
- Can be used with **EasyTorque Electric torque adapters** (Optional)

Composition:

- speedE®II Electric cordless screwdriver
- 18500 lithium ion batteries Code 41914 (2 pieces-)
- Battery charger for 18500 lithium-ion batteries Code 41915
- Series 2831 Electric VDE 1000V blade with 3.5 mm cut
- Blade Series 2831 Electric VDE 1000V with combined SL / PZ2 profile
- L-BOXX Mini case for SpeedE®

SpeedE® Electric screwdrivers must only be used with Series 2831 Electric interchangeable blades and for controlled closures in combination with Easy Torque Electric adapters.

DYNAMOMETRIC SCREWDRIVERS EASYTORQUE ELECTRIC IN SET

ITEM: EASYTORQUE SLIMVARIO® ELECTRIC

STANDARD IEC 60900

Insulated screwdrivers with interchangeable blade up to 1000 Volt, suitable for screwing in areas with parts and components under electrical voltage up to 1.000V-AC and for screwing controlled with the application of the **EasyTorque Electric DIN EN torque adapter ISO 6789** (supplied)

Composition E652204A:

- VDE 1000V SlimVario® Electric blade screwdriver
- EasyTorque Electric dynamometric adapter with fixed torque 0.8 Nm
- Series 2831 Electric VDE 1000V blades with combined profile SL / PZ1 - SL / PZ2

Composition E652204B:

- VDE 1000V SlimVario® Electric blade screwdrivers
- EasyTorque Electric dynamometric adapter with 2.0 Nm fixed torque
- Series 2831 Electric VDE 1000V blades with combined profile SL / PZ1 - SL / PZ2

Composition E652204C:

- VDE 1000V SlimVario® Electric blade screwdriver
- EasyTorque Electric dynamometric adapter with fixed torque 2.8 Nm
- Series 2831 Electric VDE 1000V blades with combined profile SL / PZ1 - SL / PZ2

Easytorque SlimVario® Electric screwdrivers must only be used with Series 2831 Electric interchangeable blades and for controlled closures in combination with Easy Torque Electric adapters.

STUBBY SCREWDRIVERS BLADE HOLDER VDE 1000V ELECTRIC

ITEM: STUBBY SLIMVARIO® ELECTRIC

NORMA IEC 60900

Compact screwdrivers with interchangeable blade insulated up to 1000 Volt, suitable for screwing in areas with parts and components under electrical voltage up to 1.000V-AC and for controlled screwing with the application of EasyTorque Electric torque adapters (Optional).

Composition:

- Stubby SlimVario® Electric VDE 1000V blade screwdriver
- Series 2831 Electric VDE 1000V blade with 3.5 mm cut
- Series 2831 Electric VDE 1000V Phillips® PH2
- Blade Series 2831 Electric VDE 1000V with combined SL / PZ2 profile

Stubby SlimVario® Electric screwdrivers must be used only with interchangeable blades Series 2831 Electric and for controlled closures in combination with Easy Torque Electric adapters (Optional)
