

## NON-METALLIC THIXOTROPIC ANAEROBIC PASTES

### ITEM: QUICK METAL 660

[SAFETY DATA SHEETS ON-LINE](#)

Ideal for repairing worn coaxial couplings. Allows you to restore bearing seats or keyways. Suitable for filling clearances up to 0.5 mm using the activator SF7649. Approved for use in a food processing environment.

- Resistance: High
- Operating temperature: -55 / +150 °C
- High viscosity
- Color: Silver
- Max. diametrical clearance: 0.5 mm
- **To repair very worn coaxial couplings**
- **P1 NSF Certificate : Can be used in the food industry.**
- **Not suitable for food contact**

Tech. Code		Package	Quantity ml	
J1015050		Bottle	50	2

## SILANE MODIFIED POLYMER SEALANTS

### ITEM: MS 930 BIANCO

[SAFETY DATA SHEETS ON-LINE](#)

Mono-component modified silane adhesive, specific for flexible structural bonding. With medium modulus, pasty consistency, thixotropic, shock absorbent. White. MPA fire resistance certified.

Tech. Code		Package	Quantity ml	
J1107300		Cartridge	310	12

## SILANE MODIFIED POLYMER SEALANTS

### ITEM: SIMP SEAL 25HM

[SAFETY DATA SHEETS ON-LINE](#)

High performance sealing adhesive. **Medium/low modulus.** Ideal for bonding and sealing various materials. Permanently elastic, excellent resistance to UV and atmospheric agents. Can be over-painted even when wet. Does not swell or shrink. Solvent and isocyanate free. Suitable for bonding metals, galvanized and stainless steels, aluminium, painted surfaces, plastics and fibreglass. Multi-purpose for the building sector. Door and window frames, horizontal and vertical joints, cladding, sheet metal and light metalwork in general. **EC1 Plus certified due to very low VOC (volatile organic compound) emissions**

Tech. Code		Colour	Package	Quantity ml	
J111125B		White	Cartridge	290	12

### ITEM: SIMP SEAL 55

[SAFETY DATA SHEETS ON-LINE](#)

High performance sealing adhesive. **Medium/high modulus.** Ideal for the elastic bonding and sealing of various materials. Excellent resistance to UV and atmospheric agents. Can be over-painted even when wet. Does not swell or shrink. Solvent and isocyanate free. Suitable for bonding metals, galvanized and stainless steels, aluminium, painted surfaces, plastics and fibreglass, used in the furniture manufacturing, nautical and transport sectors. Rapid bonding. **ISEGA Certification for food contact materials. IMO certification for marine use. EC1 Plus certified due to very low VOC (volatile organic compound) emissions**

Tech. Code		Colour	Package	Quantity ml	
J111455B		White	Cartridge	290	12
J111455N		Black			

### ITEM: SIMP CLEAR

[SAFETY DATA SHEETS ON-LINE](#)

High performance sealing adhesive for elastic bonding where high transparency is required. **Medium/high modulus.** Ideal for bonding various materials. Can be over-painted even when wet. Does not swell or shrink. Solvent and isocyanate free. Suitable for gluing glass, metals, aluminium, plastics, fibreglass and general assembly work. Rapid curing. Low resistance to UV light. **ISEGA Certification for food contact materials.**

Tech. Code		Colour	Package	Quantity ml	
J111755T		Transparent	Cartridge	290	12

## POLYURETHANE SEALANTS

### ITEM: U SEAL 500

[SAFETY DATA SHEETS ON-LINE](#)

High-performance sealing adhesive. Suitable for bonding various materials such as steel, sheets, painted surfaces and plastics. Good UV resistance, does not swell or shrink. Sandable and paintable after the film has formed.

Tech. Code		Colour	Package	Quantity ml	
J1123500B		White	Cartridge	310	12
J1123500N		Black
