

ITEM: RUST-OFF

RUST-OFF is a water-based solution for removing surface rust. This product allows you to restore the shine to oxidized metals. RUST-OFF is biodegradable and safe to use. It is non-toxic, non-corrosive, non-flammable and does not contain volatile organic compounds.
RUST-OFF does not harm copper, brass, aluminium, plastic, rubber, wood or vinyl. It does not remove paint or chrome plating unless it is oxide based.

For best results, rusty parts should be completely immersed in RUST-OFF and removed once the layer of rust has completely disappeared. A thin layer of surface rust will take 20 to 30 minutes, an average layer may take up to 4 hours and very rusty parts may require soaking overnight.
