

INFORMATION FOR USE

Metal cleaning and polishing is becoming increasingly important in order to meet the needs of today's customers. Below we offer a standard selection of products that can be used for most operations that are carried out with cleaning machines.

Fabric wheels should always be used with abrasive pastes and normally work at a speed of about 40 m/sec.

Various types of fabrics are available on request in all sizes to meet any requirement.

STITCHED SISAL MOPS FOR CLEANING METALS

ITEM: SISAL

Specific for roughing and pre-polishing. High density, usually used with the coarsest abrasive pastes. The Sisal fabric guarantees a good abrasive capacity and good absorbency. Suitable for all types of steel and metals in general. The 20 mm hole can be used with shanks of up to 25 mm.

Tech. Code		G595215020	G595220020	G595225020	G595230020
Diameter	mm	150	200	250	300
Width *	mm	20			
Hole	mm	20			
		2			

* Given the nature of the product, the width has a tolerance of approximately +/- 10%

COTTON POLISHING DISCS

ITEM: COTTON 20/20

Medium/high density hard-wearing disc, excellent cleaning performance. Good hydroscopic absorbency. Specific for ferrous and non-ferrous metals. Used for the most varied types of polishing operations. Also used for finishing gold and silver. The 20 mm hole can be used with shanks of up to 25 mm.

Tech. Code		G595515010	G595520020	G595525020	G595530020
Diameter	mm	150	200	250	300
Width *	mm	20			
Hole	mm	10	20		
		2			

* Given the nature of the product, the width has a tolerance of approximately +/- 10%

VENTILATED COTTON POLISHING DISCS

ITEM: COTTON 20/20 VENTILATED

Medium density hard-wearing disc, excellent cleaning performance. Good hydroscopic absorbency. Specific for ferrous and non-ferrous metals. The ventilation allows the tool to be kept cooler, especially on automatic machines with very intense work cycles. The slightly crossed cut allows an improved and more uniform finish.

Tech. Code		G596015020G	G596020020G	G596025025C	G596030025C
Diameter	mm	150	200	250	300
Width *	mm	20			
Hole	mm	20 with clip		25 with carton	
		2			

* Given the nature of the product, the width has a tolerance of approximately +/- 10%

SHANK MOUNTED VENTILATED COTTON DISCS

ITEM: COTTON 20/20 VENTILATED

Ventilated cotton disc mounted on a D.6 shank and can therefore be used on straight grinders.

Tech. Code		G5961D6	G5961100
Diameter		Shank	Disc
Width *	mm	6	100
Hole	mm	-	Conical
Hole	mm	-	Conico
		1	2

* Given the nature of the product, the width has a tolerance of approximately +/- 10%
